Andaman Coast Hospital
99 Phetkasem Road, Mueang Krabi, Krabi 81000, Thailand

ACH-DS-01

DISCHARGE SUMMARY

Patient name	**Mr. David Lim**	HN	HN 24-009871
Date of birth	03/11/1990	Sex	Male
Ward	Surgical Ward 2, bed 5		
Admission date	26/02/2024	Discharge date	30/02/2024

DIAGNOSIS

Primary diagnosis: Acute appendicitis

Secondary diagnoses:

- Mild dehydration

PROCEDURES PERFORMED

- Laparoscopic appendectomy

HOSPITAL COURSE

Presented with 18 hours of periumbilical pain migrating to the right iliac fossa, with nausea and low-grade fever. Ultrasound was consistent with acute appendicitis.

Laparoscopic appendectomy was performed on the day of admission without complication. Oral intake was resumed on post-operative day 1 and the patient was mobilising independently before discharge.

MEDICATIONS ON DISCHARGE

- Paracetamol 500 mg, 2 tablets every 6 hours as needed for pain
- Ibuprofen 400 mg, 1 tablet three times daily after meals for 3 days

DISCHARGE INSTRUCTIONS

Keep the wound dressings dry for 5 days. No heavy lifting or strenuous exercise for 2 weeks. Soft diet for 3 days, then return to normal diet. Seek care if the wound becomes red or swollen or if fever develops.

FOLLOW-UP

Surgical outpatient clinic in 7 days for wound check and suture removal.
